

InkFormulation System

Supported third party devices

May 2005

IFS 5 supports the following third party spectrophotometers:

- Datacolor

- CS5
- SF 450
- SF 600
- DataFlash 100
- Microflash
- Mercury
- SF 300
- SF 500
- DataFlash 80
- DataFlash 250
- Elrepho 3000

- X-Rite

- 938
- 968

- Minolta

- CM2002

Due to the high quantity of supported instruments, not all the devices could be tested under all the different operation systems and hardware conditions. Please let us know if you face a connection problem with one of the listed instruments.

Important is that we get the information of the operation system (e.g. Windows XP, SP1, German) and about the used hardware (e.g. Dell, Pentium 4, 700MHz, 256 RAM, 20 GB HD and if it is related to the IFS Online version: the internet connection speed).
